

Medicaid Managed Care Quality Measures

SFY 2015

The Ohio Department of Medicaid (ODM) established Quality Measures and Standards to evaluate Managed Care Plan (MCP) performance in priority areas (e.g., care coordination, evidence-based treatment, and person and family-centered care). The selected measures align with the ODM Quality Strategy. All of the measures were derived from national measurement sets (e.g., HEDIS, AHRQ) and/or managed care industry data.

Minimum Performance Standards were established for seventeen measures. For these measures, failure to meet the Minimum Performance Standard resulted in the assessment of a noncompliance sanction.

MCPs were evaluated on each measure using statewide results that included all regions in which the MCP had membership. Results for each measure were calculated per MCP and included all of the MCP's Ohio Medicaid members who met the criteria specified by the methodology for the given measure. MCP performance was assessed using National Committee for Quality Assurance (NCQA) calculated summary rates for the HEDIS/CAHPS survey measures and MCP self-reported, audited HEDIS data for the NCQA HEDIS measures. The HEDIS measures and HEDIS/CAHPS survey measures were calculated in accordance with *NCQA's Volume 2: Technical Specifications* and *NCQA's Volume 3: Specifications for Survey Measures*, respectively. The previous calendar year is the standard measurement year for HEDIS data. Please note that first-year HEDIS measures are not publicly reported by NCQA for individual managed care plans; NCQA will evaluate first-year measure results and determine the appropriateness of public reporting for subsequent measurement years. Results for first-year measures included in this document should be considered informational-only.

Performance Summary

At a statewide level, the Minimum Performance Standard was met for 13 of the 17 measures. All plans were noncompliant on at least one measure resulting in sanctions ranging from \$1,402,000 to \$3,542,000.

Ohio Department of Medicaid

MCP Self-Reported Audited HEDIS Results

Ranking	Description
<P10	Below the national HEDIS 2014 Medicaid 10th percentile
P10-P25	On or above the national HEDIS 2014 Medicaid 10th percentile and below 25th percentile
P25-P50	On or above the national HEDIS 2014 Medicaid 25th percentile and below 50th percentile
P50-P75	On or above the national HEDIS 2014 Medicaid 50th percentile and below 75th percentile
P75-P90	On or above the national HEDIS 2014 Medicaid 75th percentile and below 90th percentile
≥P90	On or above the national HEDIS 2014 Medicaid 90th percentile
NA	NA indicates that the MCP followed the specifications for producing a reportable denominator, but the denominator was too small (<30) to report a valid rate, resulting in a Not Applicable (NA) audit designation.
NB	Benefit Not Offered. The MCP did not offer the health benefit required by the measure.
NR	Not Reportable. The MCP calculated the measure but the rate was materially biased, or the MCP chose not to report the measure or was not required to report the measure.

Note: HEDIS 2014 benchmarks were developed by NCQA using measurement year 2013 data.
